

Unlimited flexibility

Mobile walls are not new; they have been around almost as long as Espero has. They are used to temporarily divide up, enlarge or reduce areas whilst providing or maintaining the required sound insulation. Thus multi-functional rooms can be created to the benefit of the owners and users.

The application of mobile walls is limitless: conference centres, hotels, schools, restaurants, offices, hospitals, exhibition halls, theatres and most public buildings. Mobile walls provide flexibility in utilisation of space. Espero's philosophy is to be more than that by being flexible in every sense.

Design and operation

Visio is one of Espero's mobile glass wall systems. A series of individual toughened glass panels with top and bottom clamping profiles are suspended from and slide along a aluminium ceiling track. The panels are pushed together and interlock to form a wall. Each panel is individually locked into place ensuring a high level of security.

The Visio is available with standard panels and single or double door panels. Once unlocked the panels can be moved effortlessly and quietly along the especially designed aluminium overhead track system. The track and carrier system provides ease of operation and flexibility allowing walls to be positioned or parked in countless configurations.

Appearance and finishes

All glass finishes used in interior design can be applied and the aluminium profiles can be coloured to suit offering total creative freedom. Options such as laminated, etched, coloured, printed and sandblasted glass finishes are all possible.

Key Features and Benefits:

- optimised space utilisation and visibility
- panels can be locked independently for maximum security
- flexibility through a choice of door and panel options
- Visio mobile glass walls can be positioned and parked away easily, quickly and silently
- configuration of the walls is limitless: straight, curved, around corners, etc.
- track can be seamlessly integrated in any kind of ceiling

Options

It is possible to have sweep seals on the top and bottom of the panels and to have the edge of the glass panels delivered with a profile.

Besides the Visio range Espero offers three other product ranges:

- Sonico mobile walls
- Flexio flat folding walls
- Unu & Duplo folding walls
